You can hit it longer off the tee

Some mock the advertising of extra distance, claiming that if all the claims were true, then we'd all be hitting the ball over 300 metres. Well, the fact is that there are 165-pound golfers hitting the ball 300 metres. How far do you hit the golf ball? What's your gap to 300 metres? How much of that could you fill? Find your potential for more.

What are you buying?

More than hope, you want

certainty.

There's already too much that is 'random' in golf. You want a relationship with your irons that will add certainty.

There's quite a large group of golfers who arrive at the club NOT knowing whether they'll shoot in the mid 90s or high 70s that day. The way they strike their iron shots can be so off one day and so perfect another.

Get fitted: Add certainty

Does your golf swing require difficult to repeat compromises? Does your brain and body have to intuitively compensate for poorly fitted golf equipment? That's why Professionals desire a simple swing and fitted equipment. It adds certainty.
